

HEALTHCARE DESIGN

UMC MEDICAL CENTER GREEN VALLEY, ARIZONA

This building was formerly an urgent care facility that UMC acquired for the use of a primary care facility to service Green Valley residents.

The project scope was to completely demolish the interior of the building, add building exits, and to space plan the entire facility. The overall footprint was reworked to allow for the functional operation flow of a primary care clinic.

The warm, neutral color palette for this project was one of two custom selections that Intertech compiled for the clients to choose from.

This space includes doctor and staff offices, exam/procedure rooms, labs, record rooms,] lobbies, and a staff lounge.
