## Alpha Graphics *275 sites Worldwide*

Intertech has developed the designs of over 275 AlphaGraphics stores, both domestic and abroad. Intertech has been involved with the design of all aspects of AlphaGraphics stores from new installations to remodels. AlphaGraphics store range in size from 2,000 to 11,500 square feet.

We at Intertech understand the function of the AlphaGraphics shop from the technical requirements of the machines, to the time-motion requirements of operating a store profitably. Intertech consults with each store's management to develop the most efficient, best functioning store within their budget. Through each stage, we maintain constant communications to successfully plan each store. Our staff of talented designers create a functional space plans, and work with store management to achieve a creative plan that meets the standards set by AlphaGraphics.

Intertech has made a strong commitment to AlphaGraphics by developing a special software program created specifically for our AlphaGraphics projects. Working in conjunction with AutoCAD, this program allows us to be more accurate with equipment requirements, provide quality designs and have a quicker turnaround time. The efficiency of this software also translates into reduced costs for our client!

This model store was created as a means to show new franchisees a typical store size and layout. Of course, each new store presents a unique equipment package and may emphasize different areas of production. Intertech works with each individual franchisee to ensure that their new store is workable and unique.
