## Pyramid Credit Union

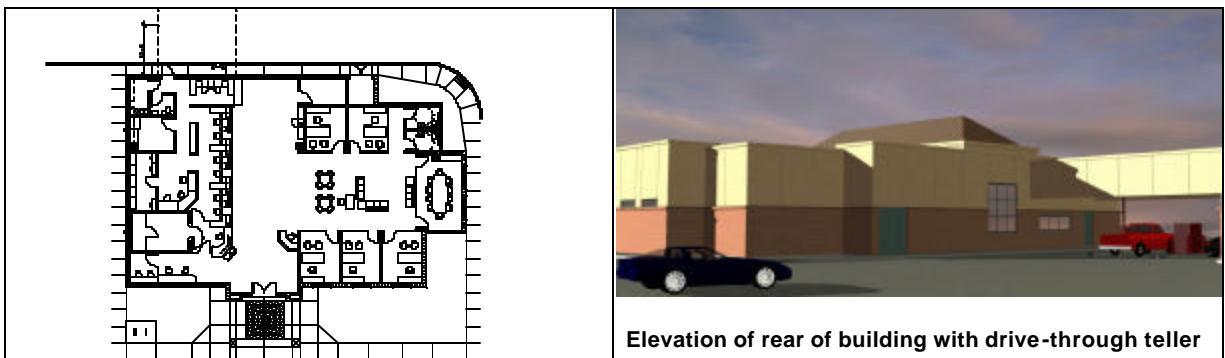

*Tucson, Arizona*

**Elevation of building front**

Pyramid Credit Union was established for postal employees in 1925. They have recently expanded their field of membership. The credit union staff is entirely dedicated to the welfare of their members in a professional, yet family-style environment.

Pyramid is introducing its newest office in the rapidly growing eastern area of Tucson. This 4,714 square foot location is under development on southwest corner of Rita and Houghton Roads. Intertech is developing the project in total. We are involved in development of the land, the exterior and interior building plan and custom interior design.

**Elevation of rear of building with drive-through teller**

Intertech used an “inside-out” approach in designing the credit union. We met with the employees numerous times to gain a complete understanding of their needs. We worked with vault and teller station equipment suppliers to insure their products met the end user requirements. The design includes a children’s area and a welcoming, comfortable lounge area for members. This was a critical portion of Pyramid’s philosophy. Every aspect of the design incorporates the needs of their membership.
